## SUMMARY

**Computer Science Engineering student** seeking an entry-level **Full-Stack Web Developer** role. Skilled in **React.js**, **Node.js**, **Express.js**, **MongoDB**, **Firebase**, **JavaScript**, **HTML5**, **CSS3**, **Tailwind CSS**, and **REST API integration**, with hands-on experience building and deploying responsive full-stack web applications. Strong understanding of frontend-backend integration and modern web development workflows.

## SKILLS

**Full-Stack / MERN:** React.js, Node.js, Express.js, MongoDB, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Web Design  
**Programming Languages:** JavaScript, Java, Python, C, C++  
**Web & Backend:** REST API Integration, JSON, Firebase Real-Time Database, Firebase Authentication, React Router  
**Frontend Fundamentals:** DOM Manipulation, ES6+, Flexbox, CSS Grid  
**Tools & Deployment:** Git, GitHub, VS Code, Vite, Postman, Chrome DevTools, Vercel, Netlify  
**Cloud Fundamentals:** Cloud Computing Foundations (Duke University)

## EXPERIENCE

**IBM (via FutureSkills Prime)** | *Virtual Intern – Web, Mobile Development & Marketing* July 2026 – Sept 2026

- Completed a comprehensive virtual internship by IBMCEP covering modern web development, mobile application development, and digital marketing strategies.
- Applied full-stack development skills to build and deploy dynamic web applications, contributing directly to an AI-powered e-commerce platform.

## EDUCATION

|                                                                                                                            |                                                      |

## PROJECTS

**BargainCart – AI-Powered E-Commerce** | *IBM Virtual Internship Project* [View Website](#)

- Developed a modern full-stack e-commerce and rental web application during the IBM Virtual Internship, featuring a dual store system supporting Buy and Rent options.
- Implemented an interactive AI Bargaining Assistant for dynamic price negotiation within smart limits before checkout.
- Built a live Admin Dashboard for inventory management, real-time order/rental tracking with timestamps, and admin-controlled cancellations.

**Tech Stack:** React.js, Node.js, Firebase Auth & DB, JavaScript, HTML5, CSS3, Tailwind CSS, Vercel

**AI-Powered E-Commerce System** | *Final Year Group Project* [View Website](#)

- Collaborated in a team for our final year project to develop a responsive AI-powered e-commerce web application using React.js and Next.js.
- Integrated REST APIs for product management, user authentication, and real-time price negotiation features.
- Built a mobile-friendly interface using Tailwind CSS, ensuring responsive design across different devices and screen sizes.

**Tech Stack:** React.js, Next.js, JavaScript, HTML5, CSS3, Tailwind CSS, REST APIs

## RESEARCH PUBLICATION

**AI-Powered Bargaining System for E-Commerce Platforms** [Research Paper](#)

- Authored a research paper on AI-powered bargaining systems for e-commerce platforms, focusing on customer engagement and dynamic pricing.
- Conducted a literature review of research on artificial intelligence, negotiation systems, and consumer behavior.
